- **Installation:**

- ✚ The TWO-Combi Box with Grille is easily mounted on the wall by removing the front part by unscrewing the 6 screws on the part sides and mounting the back piece to the wall with 4 screws.
- ✚ The combi box can be mounted with the exhaust-air outlet either on the right or the left.
- ✚ We recommend using a sealant between the back piece of the combi box with grill and wall to avoid water entering the building.
